

Open letter of Islamic Emirate to the American President Donald Trump

To Donald Trump, the President of the United States of America

Peace be upon those who follow the guidance!

Your forces have spent 16 years in our country Afghanistan and have used every means to win this war. Despite the fact that the former administration officials created a large coalition to attack our country, your 16 year military presence in Afghanistan has resulted in Afghanistan becoming the most unstable country security wise, the most corrupt administrative wise and the poorest country economically.

The reason behind all this is because foreign invasion is being used to subdue the will of our proud Afghan nation, our national integrity is stripped and keys to power have been handed to individuals who are the most repulsive, wretched and hated faces in the Afghan society due to their servitude to foreigners.

President Trump!

It is entirely possible that you are being provided rosy pictures about Afghanistan by the stooges you have installed and they are showering you with titles 'allies of the Afghans' in their ceremonial addresses but understand that the Afghans possess sound intellect. They judge you by the results of your 16 year presence in Afghanistan and not by the slogans of the lying corrupt rulers under your control.

You must realize that these repulsive sellouts neither care about your interests nor that of their own nation, rather the only thing they hold dear is retaining their seat of power and securing their personal interests.

They are not solely subservient to you either but will eagerly be the puppet of any foreign backer to retain their illegitimate grip on power. Even in the current government that you have built, they maintain illicit contacts with tens of other foreign powers.

President of America!

The government which you tried to establish over the past 16 years by spending billions of dollars, sacrificing thousands of soldiers and losing tens of thousands to injuries and mental illness is in a condition where its leader cannot accept his own deputy. You are witnessing that at this very moment the First Vice President - the war criminal and warlord - General Dostum is creating an opposition coalition outside the country against Ashraf Ghani, provincial governors have begun rising against him and Members of Parliament are demanding his resignation.

President Trump!

If you glance over history you will come to know that the Afghans have done you the biggest favor internationally. They rescued you and the entire world from the Red Communist Plague with their immeasurable sacrifices. Do you wish to repay this historical favor of the valiant Afghan nation by forcing upon them such incompetent, corrupt, immoral and criminal officials?

A sound mind and healthy conscience dictates that the monumental actions and international favor of this persecuted nation should be repaid by dealing and interacting with them generously and not through invasions, throwing them into the fire of imposed wars, trampling upon their religious and national values and installing the most corrupt officials as custodians of their affairs.

President of America!

Your previous officials decided to invade Afghanistan without weighing its consequences. They occupied Afghanistan under irrational arguments which had nothing to do with the Afghans. The Afghans who rose against your forces in defense of their land, creed and people did so as a legitimate struggle that is why the fully armed forces of 48 nations under your leadership were unable to pacify and eliminate them.

The Afghans have no ill-intention towards the Americans or any other nation around the world but if anyone violates their sanctums then they are mighty proficient at beating and defeating the transgressors.

The religious and national struggle of our people is not some illegitimate or proxy war rather it takes root from a pure spiritual and national fervor. Your intelligence agencies admit that our Mujahideen are not being supported by any country and neither can they produce any proof in the contrary. After repeated invasions, our nation understands well how to wage long wars with invaders and force them out of their homeland with their traditional weapons and equipment paired with towering resolve and zeal.

Mr. President!

American youth are not born to be killed in the deserts and mountains of Afghanistan in order to establish the writ of thieves and corrupt officials and neither would their parents approve of them killing civilians in Afghanistan. Rather you and American officials have the grave responsibility of protecting the lives of American youth which is your indispensable human resource. It seems to be a historical mistake on part of the previous administrations to have dispatched American youth for the slaughter of Afghans however as a responsible American President, you need to study the mistakes of your predecessors and prevent death and injury to American forces in Afghanistan.

Generals are concealing the real statistics of your dead and crippled however the Afghans can easily count the coffins being sent your way on a daily basis

President Trump!

We have noticed that you have understood the errors of your predecessors and have resolved to thoroughly rethinking your new strategy in Afghanistan. A number of warmongering congressmen and Generals in Afghanistan are pressing you to protract the war in Afghanistan because they seek to preserve their military privileges but instead you must act responsibly as the fate of many Americans and Afghans alike is tied to this issue and as is often said '*War is imperative politics which cannot be left alone to the whims of fighters*'. You must also not handover the Afghan issue to warmongering Generals but must make a decision where history shall remember you as an

advocate of peace.

The war situation in Afghanistan is far worse than you realize! You are witnessing that Mujahideen are wresting control of several districts from the corrupt regime in a one week span and are seizing so much equipment that they can continue fighting for a long time. They can easily take control of all major highways of the country and if it were not for fear of civilian casualties, they would conquer many provincial capitals currently under sieges.

Here every Afghan views your soldiers as invaders and transgressors and even the soldiers who you spend a lot of treasure upon frequently open fire on your troops with the same weapon you have provided. Here every parent teaches his offspring about emancipating his country from invaders. In a land where every child is raised with a spirit of vengeance and holds the historic honor of defeating three Empires before you, how will you achieve a stable condition for permanent presence?

President of America!

Everyone now understands that the main driver of war in Afghanistan is foreign occupation. The fire of war has been lit due to foreign occupation and everyone is utilizing these war conditions for their self-interests. If there was no war here, a responsible assertive government could have prevented anarchy and lawlessness. You have understood through your experience in the Middle East that kindling the fire of war is not in the interest of any country around the world.

Previous experiences have shown that sending more troops to Afghanistan will not result in anything other than further destruction of American military and economical might therefore it would be wise if you adopt the strategy of a complete withdrawal from Afghanistan instead of a troops increase. On the one hand, this strategy will truly deliver American troops from harm's way and on the other, it will bring to an end an inherited war by rectifying the mistakes of former American officials.

Final Words

President of the United States! The uprising of the people of Afghanistan under the leadership of Islamic Emirate is an organized and accountable national, political and regional military force which has prevented many calamities from taking root. If it were not for the responsible policies and organized movement of the Islamic Emirate, such disorder would arise that its flames shall reach the neighbors, region and the entire world. If someone were to understand this reality, they would truly consider the Islamic Emirate as mercy for Afghanistan, region and the world because the Islamic Emirate does not have any intention or policy of causing harm to anyone and neither will it allow others to use the Afghan soil against anyone. It would be a grave mistake on your part to force the Afghan Muslim nation - who have so far fought you with their meager tools - to reach out to your foes in order to gain their independence and free themselves from your oppression. Therefore it would be better for you to understand the realities as a responsible President of the United States and then make decisions based upon them. And understand this with an open heart that if you failed to win the Afghan war with professional US and NATO troops, advanced technology, experienced military Generals, consecutive strategies and mighty economy, you shall never be able to win it with mercenaries, notorious contractor firms and immoral stooges.
