Warning by Military Commission of Islamic Emirate to hostile media outlets

د افغانستان اسلامي امارت

It has been observed that some media outlets in Kabul and surrounding provinces are broadcasting messages under commercial advertisement that denounce the ongoing Jihad, Mujahideen and Taliban, encourage opposition, are financed by Kabul administration security departments and an all out effort is exerted to use these media outlets as intelligence tools against the ongoing Jihad, to brainwash common Afghans and carry out direct espionage activities for the enemy.

The Islamic Emirate of Afghanistan's Commission for Military Affairs sternly warns all TV, radio and other broadcast channels to immediately halt their hostile activities.

If every local and national FM radios, TV channels and other media outlets do not seize such activities within a one week period then the Mujahideen of Islamic Emirate will not consider these outlets as media channels but as enemy intelligence nerve centers. They shall become military targets for the Mujahideen in the capital, provinces, cities and rural areas and none of their offices, journalists, workers and personnel shall retain any immunity.
